

Country Codes

Several fields in the database use WIPO-standard two-letter codes to represent country names. Searching for the full name of a country will not yield positive search results because only the two-letter country code exists in the data. You should use the codes in this table for your searches in country fields such as "Inventor Country" and "Assignee Country".

Country Codes/Names Ordered by <u>Name</u>	Country Codes/Names Ordered by <u>Country Code</u>
